

Direct to interview route

Ready to complete your Professional Review? There are options specially created just for you.

If you struggle with written assessments, you can choose to take our 'direct-to-interview' route to complete your Professional Review using your verbal skills.

This route is a great option if you have dyslexia, a visual impairment, ADHD or anything that may hinder completing your assessment to your highest standard.

Information about the direct-to-interview route

- You will still be required to complete the Professional Review template. The report provides the basis for the interview questioning and not having a report would put you at a disadvantage. If you need help completing this, please reach out to our team.
- Your application will be sent straight to the interview panel members, and you will not be deferred on your written application. The Professional Review team can still return your application if there is insufficient information contained within the report.
- As there will be no initial assessment of your report by an assessor, the panel will question you on every aspect of your report. A standard interview following an assessment is only based on competence gaps the assessor has found in the report.
- The interview will last 1hr 15 minutes to 1hr 30 minutes.
